

Volanti Unveils The Cube Gen2 — A Video Display In 3 Dimensions

Date : February 22, 2015

Morgan Hill, CA – February 22, 2015 – Volanti Displays, a Silicon Valley company that specializes in innovative large screen displays, recently unveiled The Cube Gen2 (www.volantidisplays.com/cube.html).

The unique 3-D video cube wowed audiences in testing. “The Cube will definitely be the coolest LCD display in 2015. Looks like a door to another dimension,” said Amp Live, a leading Beat Maker/Producer who helped test The Cube in a recent live performance.

Originally designed for artists who want to bring an exciting new element of visuals to their production. Measuring 21” on each side, The Cube displays high-resolution 1920x1920 video on multiple sides. The display quality is incredible, consisting of LCD panels using LED backlight IPS technology.

“There has been tremendous interest from other market segments as well,” stated James Henry, CEO of Volanti Displays. “The Cube is ideal for trade shows, exhibitions, corporate lobbies, live events and retail digital signage,” added Henry.

Demos of The Cube Gen2 will be ongoing at the Volanti Displays booth #656 at ExhibitorLIVE 2015 from 11:30 am – 3:30 pm, March 2-4, 2015, Mandalay Bay Convention Center, Las Vegas, NV. For additional information contact James Henry at 408-828-6739 or at james.henry@volantidisplays.com.
