

Volanti Displays Unveils the Forza Mobile Video-Wall

Date : October 9, 2014

Morgan Hill, CA – October 9, 2014 – Volanti Displays announced today a unique solution for bringing video-wall technology to any venue. The Forza is the first of its kind mobile video-wall unit.

The [Forza mobile video-wall](#) is delivered in wheeled carts that transform into the base and frame. In less than 20 minutes a complete 94” or 110” video-wall is ready for use.

“In the past, video-walls were not something that could easily be put up or taken down,” said James Henry, CEO of Volanti Displays. “We know digital signage and messaging is a powerful tool. We wanted to develop a product that was mobile and easily accessible,” added Henry.

The Forza offers LCD technology in models for both indoor or outdoor usage. It has an ingenious gas-spring mechanism, which makes for an easy ‘pop and show’ video-wall. The wiring is preconfigured and straightforward and the industrial strength wheels make moving and positioning easier than ever.

Volanti recently unveiled the Forza at the Northern California Facilities Expo to much excitement. “There was a ‘buzz’ regarding this product,” stated, Michael Sarich, Business Development Manager for Volanti Displays. “It’s definitely unique; people kept coming back to take another look.”

The mobile video-wall is ideal for business meetings, trade shows, trainings, fundraisers, museums, galleries or anywhere you might want to engage your audience.
