

Quick Start Guide

Installation:

• Unbox the Monitor

- Remove the lid from the box. Attach the mounting brackets to the monitor before fully removing it from the packaging. Then, proceed to mount the monitor on a wall or cart as needed.

• Connect the Cables

You have two ways to connect your computer:

- Plug the USB-C cable into your computer. This one cable does both video and touch.

(If your computer doesn't have USB-C, connect the DP or HDMI cable for video)

• Plug in the Power

- Connect the power cable to the monitor, then plug it into the wall.

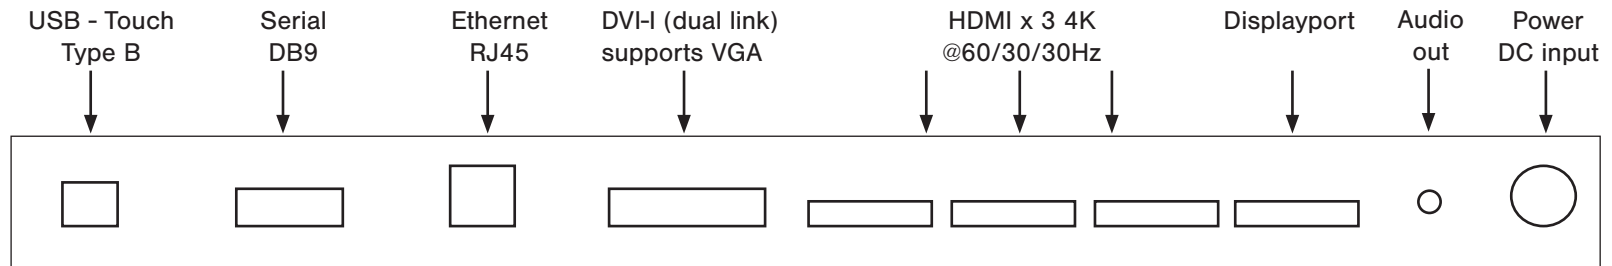

Note: The monitor will turn on by itself when it sees a signal from your computer. You can change this in the monitor's settings menu if needed.

Maintenance: Ensure inside edges of the bezel are not obstructed.

In the Box

- Volanti touch monitor.
- Power supply and power cord
- USB-C

Installation:

- **Unbox the Monitor**

- Remove the lid from the box. Attach the mounting brackets to the monitor before fully removing it from the packaging. Then, proceed to mount the monitor on a wall or cart as needed.

- **Connect Video and Touch Cables**

- Plug the video cable and USB touch cable into your PC or other compatible device.

- **Plug in the Power**

- Connect the power cable to the monitor, then plug it into the wall.

Note: The monitor will turn on by itself when it sees a signal from your computer. You can change this in the monitor's settings menu if needed.

Maintenance: Ensure inside edges of the bezel are not obstructed.

In the Box

- Volanti touch monitor.
- Power supply and power cord.
- HDMI cable
- USB touch cable
