VOLANTI DISPLAYS

Quick Start Guide

Installation:

- **Unbox the Monitor**

- Remove the lid from the box. Attach the mounting brackets to the monitor before fully removing it from the packaging. Then, proceed to mount the monitor on a wall or cart as needed.

- **Connect the Cables**

You have two ways to connect your computer:

- Plug the USB-C cable into your computer. This one cable does both video and touch.
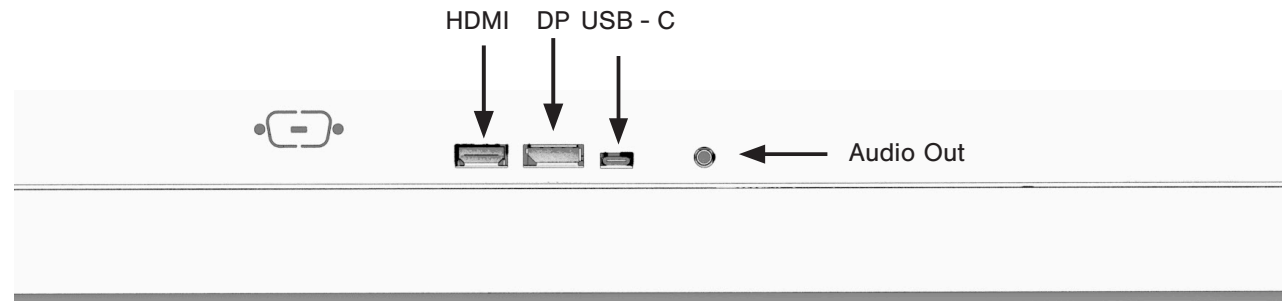

(If your computer doesn't have USB-C, use the USB-C to USB-A adapter we provided and connect the DP or HMDI cable for video)

- **Plug in the Power**

- Connect the power cable to the monitor, then plug it into the wall.

Note: The monitor will turn on by itself when it sees a signal from your computer. You can change this in the monitor's settings menu if needed.

Maintenance: Ensure inside edges of the bezel are not obstructed.

HDMI   DP USB - C

Audio Out

In the Box
- Volanti touch monitor.
- Power supply and power cord
- USB-C
